## Declaration of Conformity

On January 27, 2003, the European Parliament and the Council of the European Union put in force directive 2002/95/EC („RoHS“) on the restriction of the use of certain hazardous substances in electrical and electronic equipment and directive 2002/96/EC on Waste Electrical and Electronic Equipment (“WEEE”).

In compliance with its Company Policy, GFS is committed to the economical use of energy and materials and to the avoidance of the use of materials or processes harmful to the environment. Adhering to directives 2002/95/EC (“RoHS“) and 2002/96/EC (“WEEE“) within the time frame stipulated by the EC is an obligation for GFS which the company will fulfil in close cooperation with its suppliers. If it should prove during the implementation of the European Union guideline 2002/95/EG (“RoHS“) that the quality of a product is affected and can no longer be maintained due to this guideline, we shall try and find an appropriate solution in close cooperation with our customers.

GFS herewith declares that the Thin Film Nickel Temperature Sensors meet the guidelines 2002/95/EC (“RoHS“) and 2002/96/EC (“WEEE“).

We are at your complete disposal for further information.

Villingen-Schwenningen, June 15, 2006
